

**SAFE AND TRUSTED**

We use only natural, human-grade ingredients.

All of our products are non-irritating and applied topically, never ingested. Safe for pets of all ages. Always cruelty free.

- X No parabens
- X No peroxide
- X No bleach
- X No steroids
- X No antibiotics
- X Not ingested

**ACTIVE NATURAL INGREDIENTS**

**Witch Hazel:** Its astringent properties dry the area and kill bacteria.

**Boric Crystals:** A natural cleanser and antibacterial that is used in well-established eye treatments to help relieve irritation and discomfort. In powder form it is also a pharmaceutical grade drying agent, which keeps the affected area dry.

**Colloidal Silver:** A natural antibacterial, antiviral and anti-inflammatory, which mimics the properties of antibiotics. This will help control and stop the growth of bacteria, causing the tears stains.

**Goldenseal:** Mimics the properties of a natural antibiotic to help remove the bacteria that causes tear staining.

**Echinacea:** An anti-inflammatory which also acts as a natural antibiotic, helping to reduce bacterial infections.

**Eyebright:** Has been widely used to treat infected, inflamed and irritated eyes. This herb has anti-inflammatory, antibacterial and astringent properties.

**QUESTIONS**

We've answered the most common questions below. For more visit: **eyeenvy.com/frequently-asked-questions**

**1. When should I expect to see results?** Success really depends on the cause and extent of the staining. Eye Envy products do not contain bleach and are not cosmetics or cover-ups. Eye Envy products are formulated treatments. If you follow the directions with regular use, you should see an improvement within 7 days.

For best results, follow our 3-step process daily until the staining has gone and then continue once or twice a week to prevent new stains from forming.

**2. Do I need to refrigerate my solution?** Refrigeration is only required if you purchased the original version of our solution, which has 'keep refrigerated' on the label. Once opened, refrigerate and use within 4-6 weeks.

**3. Which products can I use to remove stains from around the mouth?** Use the Tear Stain Facial Cleanser to wash the face, then follow with our Beard Stain Remover Spray. It is specially formulated to help remove stains caused by oxidation of saliva, food colorings and bacteria/yeast infections.

**4. These products are not working – why?** These products work for most dogs and cats, but not without those two extra ingredients – commitment and patience. If you have used our products as directed, then these products should work for you.

We are so confident of it, that we offer our 'Love the Difference in 7 Days' money back guarantee. Other products (even shampoos) previously used to lighten or remove the stains can affect the performance of Eye Envy products. Products that contain bleach/peroxide and other brightening agents (such as blueberry or cranberry) can make the hair shaft very porous, causing the stain to set in. These ingredients will initially clean the hair, but any staining will become permanent.

If you have used or are using bleach, peroxide or any of these types of products, please stop. Facial scrubs/lightening shampoos etc. can be replaced with Tear Stain Facial Cleanser, which does not dye the fur and helps treat the cause of staining. By using Eye Envy you are preventing future tear stains from forming and regrowth will be stain-free. Any permanently dyed fur can be trimmed once grown out.

**SAFE. SIMPLE. EFFECTIVE.**

Eye Envy products are non-irritating and natural. We select the very best from nature, to create products that are simple, safe and effective.

Our unique stain care line contains all natural, safe ingredients, including Colloidal Silver – a natural antibacterial that targets the root of the problem rather than masking it.

Get brighter, whiter eyes in 3 simple steps and a soft, kissable stain free face.
